Anti-legionella ball valves RV 66-67-68-69 technical data

Technische Daten der Kugelhähne für Anti-Legionellen RV 66-67-68-69

#### Applicazioni

Sono adatte per impianti di distribuzione d'acqua potabile.

#### Anti-legionella

Il tipo di sfera utilizzata permette di evitare il ristagno dell'acqua nella valvola. In questo modo si evita che i batteri, eventualmente contenuti nell'acqua, possano rimanere a lungo nell'impianto al contrario delle normali valvole.

#### Antigelo

Il tipo di sfera utilizzata permette di mantenere sempre in comunicazione corpo valvola-sfera - tubazione, evitando che l'acqua gelando, possa creare pressioni tali sul corpo valvola sino a provocarne la rottura.

Valvola a sfera a passaggio totale, anti-legionella per acqua potabile, attacchi filettati F/F - M/F.

Standard leva verde

Omologazioni internazionali

#### Applications

Are suitable for potable water distribution plants.

#### Anti-legionella

This type of ball prevents water from stagnating in the valve. In this case the bacteria, that may be in water, cannot remain in the piping for a long time unlike the other traditional valves.

#### Frost-proof

Thanks to this particular shape of the ball the valve body, the ball and the piping are always connected so that frosted water cannot put the valve body under pressure and break it.

Anti-legionella full bore valve for potable water, threaded ends F/F - M/F.

Standard green lever

International approvals

#### Verwendung

Eignen sich für Trinkwassersysteme.

#### Antilegionellen

Die Art der verwendeten Kugel ermöglicht es, die Stagnation des Wassers im Ventil zu vermeiden. Auf diese Weise wird vermieden, dass Bakterien, die im Wasser enthalten sein können, können sie für eine lange Zeit in der Anlage bleiben gegenüber den normalen Ventilen gegenüberliegenden.

#### Frostischer
